

Listening Doll Directions

1. Once you get you clay, you may start shaping the body. It should be between five and seven inches long.
2. Next, you should make the head, arms and legs.
3. Make the doll's face either by using tools or adding other materials.
4. When you're done making the doll, you can clothe and decorate your doll using fabric, string, and the other supplies available.
5. When you're satisfied with your work, take your doll to the listening area.
