

Baseball Sounds

Your task is to create an audiotape of the sounds of baseball. The first step is to think about the sounds you may want to include. You can visit the following websites to get ideas:

- Little League Sounds

<http://greatwebdesign.biz/little-league/html/sounds.htm>

- Mark McGwire

http://sportsillustrated.cnn.com/baseball/mlb/news/1998/09/07/mac_61/buckcall.wav

You can use the baseball-related items your teacher has provided in your recording or use some of the sounds you heard on the websites.

As a group, brainstorm ideas. Use the questions below to help you plan.

What sounds do you hear at a baseball game?

What sounds are in the background?

What voices do you hear?

What does it sound like when someone hits the ball with the bat?

What does it sound like when someone catches the ball?

What does it sound like when someone misses the ball?

In the space below, write down your plan with all the sounds you are going to include on your tape.

Record your tape. Rewind the tape when you are finished to ensure that you have captured the sounds you wanted to include. When you are finished, you are going to share your work with your classmates. Write a paragraph explaining how you made your audiotape in the space below.
